Building security seminar

Various measures to protect the safety of Tokyo residents

To ensure the safety and security of Tokyo, the TMPD is adapting to changes in a new era, implementing measures to protect personal safety and establish a society shielded from crime. These efforts are embodied in the slogan, "Keeping Tokyo always safe and secure – world's leading safe city" and include community safety policing that meets the expectations and trust of Tokyo residents and the nation.

Scan the 2-D bar code for more information on community safety initiatives (only in Japanese).

Jobs advertised on social media and internet forums with enticing promises like "high income in a short time" are "illegal part-time jobs."

If you apply, you may end up working for a criminal organization, used as a "receiver" or "withdrawal handler" in fraud schemes or even becoming a criminal yourself by taking part in robberies or other crimes.

If something seems suspicious, consult with friends, family, or the police.

The TMPD is moving forward with various measures to eradicate such illegal part-time jobs.
